

Easy Steps

Why Websites Use

Let's say Bob visits a shoe website

Hey, can I take a look at your products?

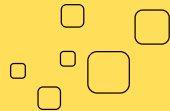

First, you need to sign in

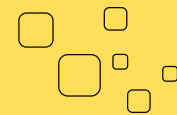

Bob successfully logged in

Yes, here are my name
and password

Great proceed

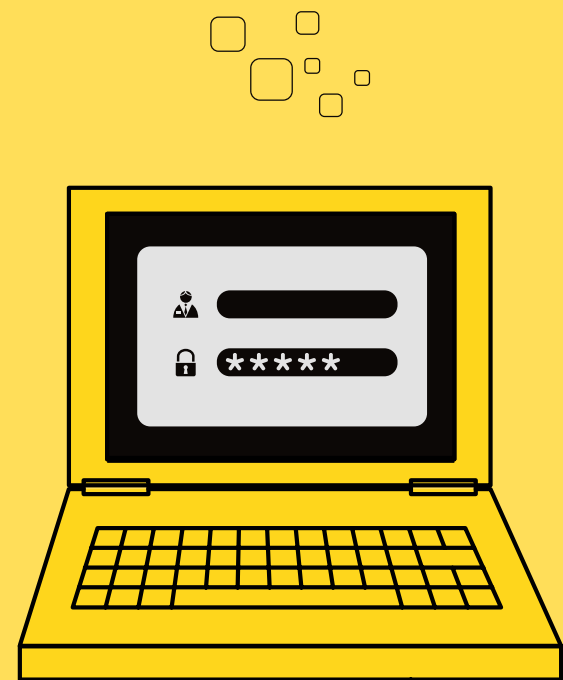

Bob wants to checkout

**These shoes are great
i want to order them**

**First, you need
to sign in**

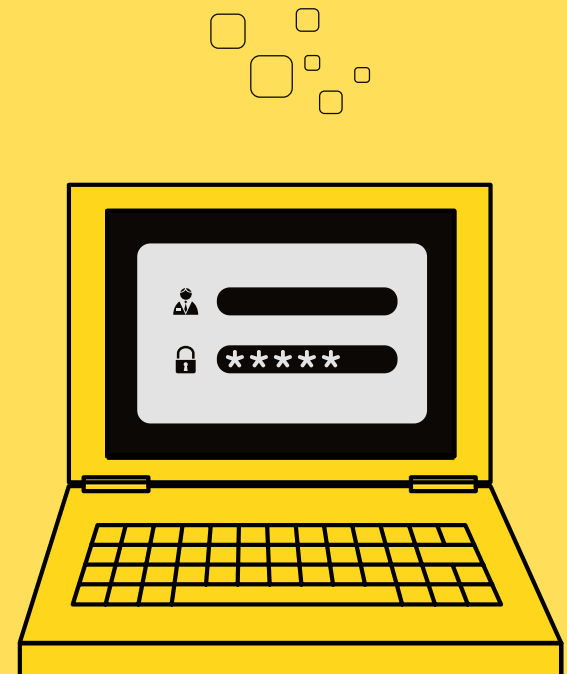

What?

**Umm ... I already did
what you're asking!**

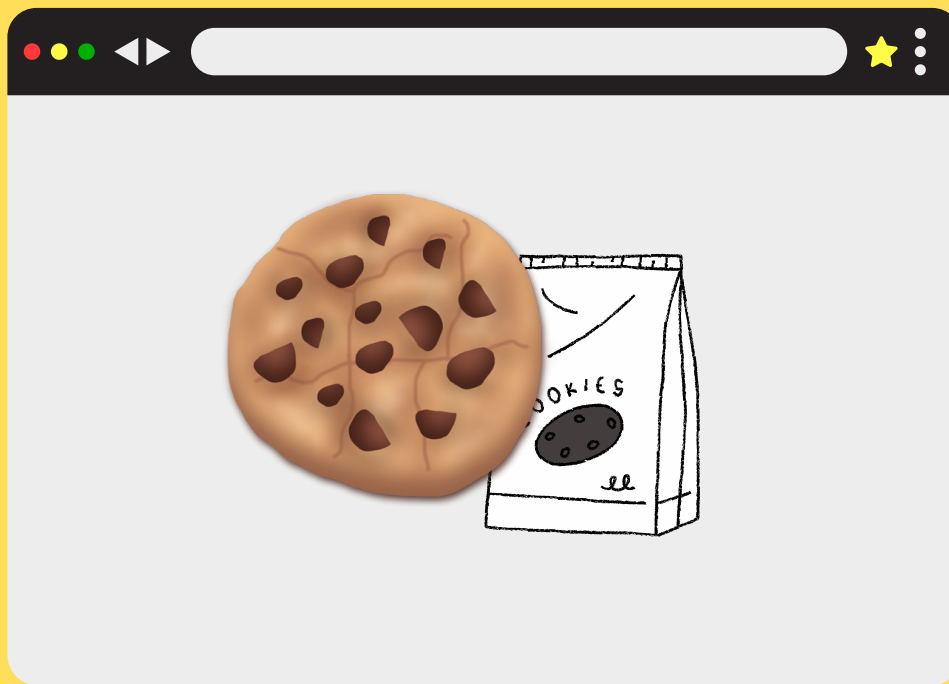

**First, you need
to sign in**

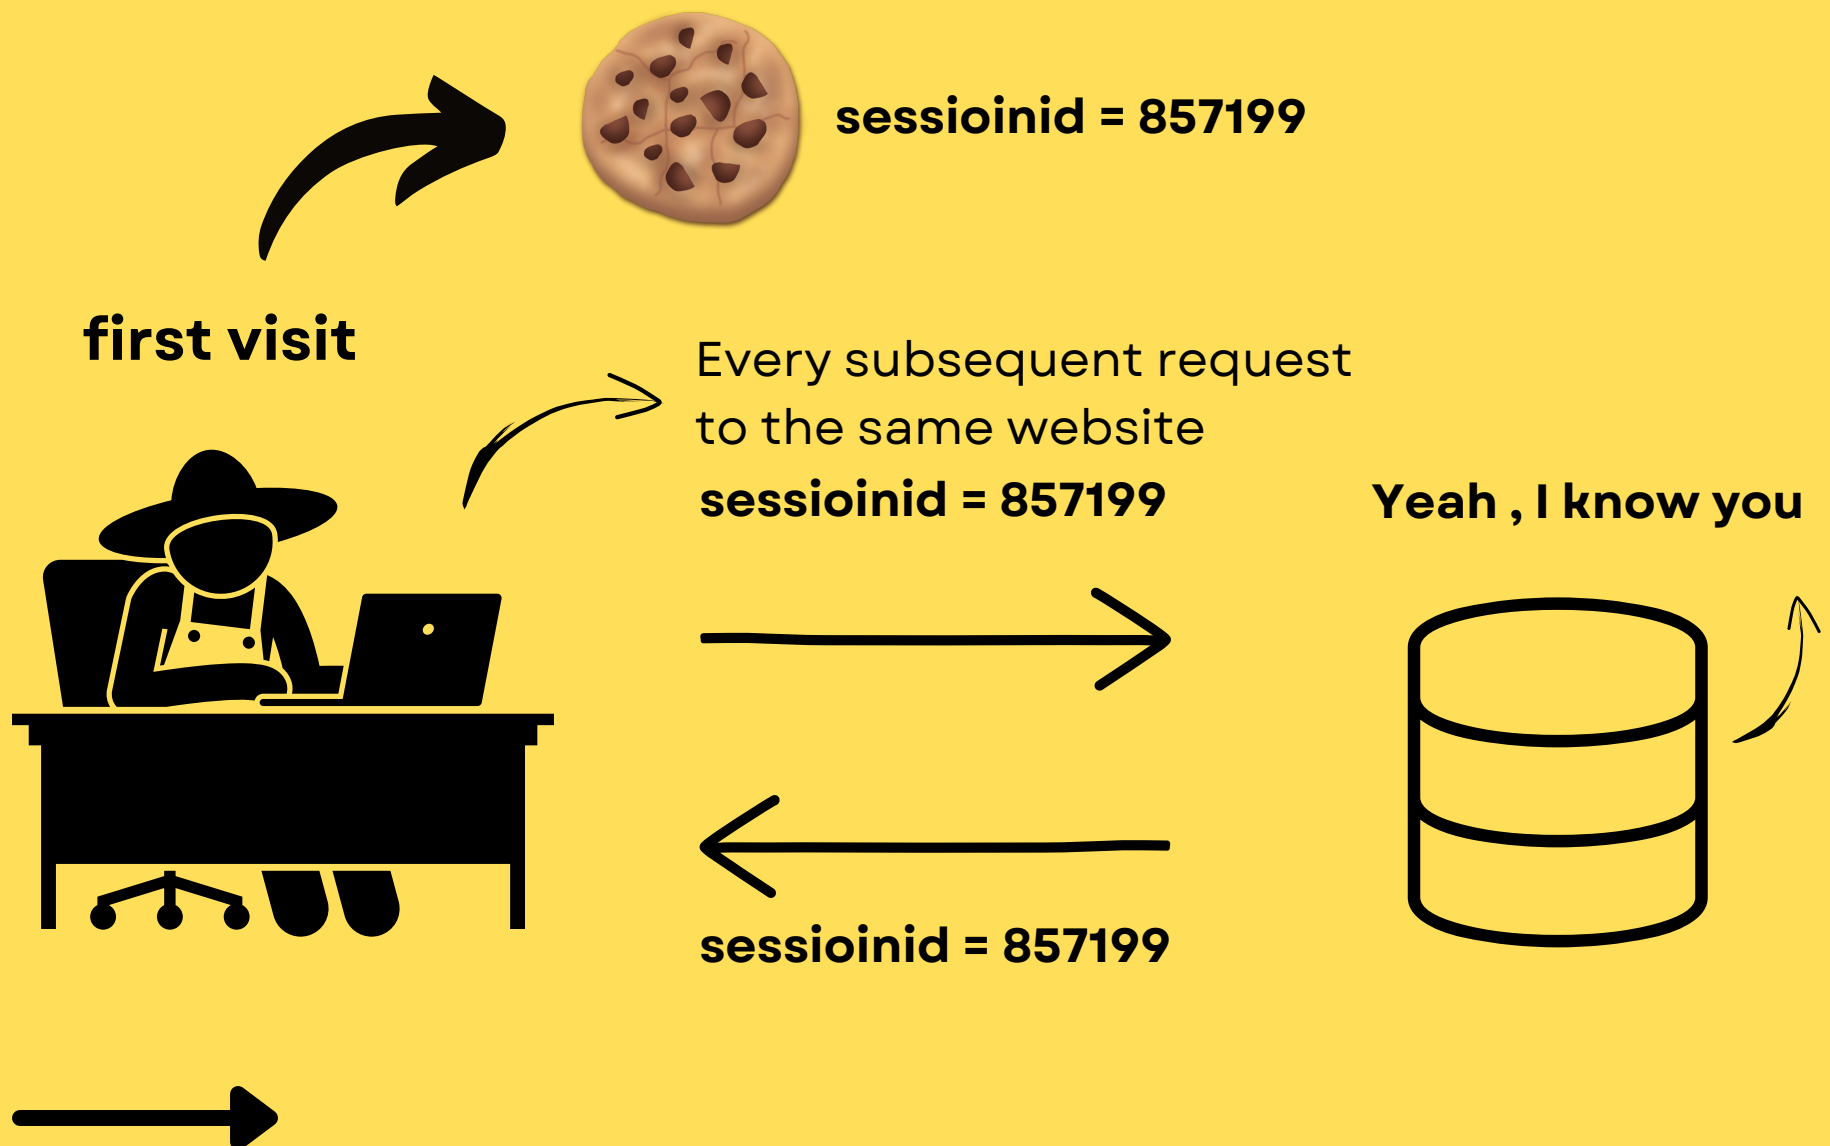

This is where Cookie comes in

Cookies are small files that websites store on your computer they help the website identify you

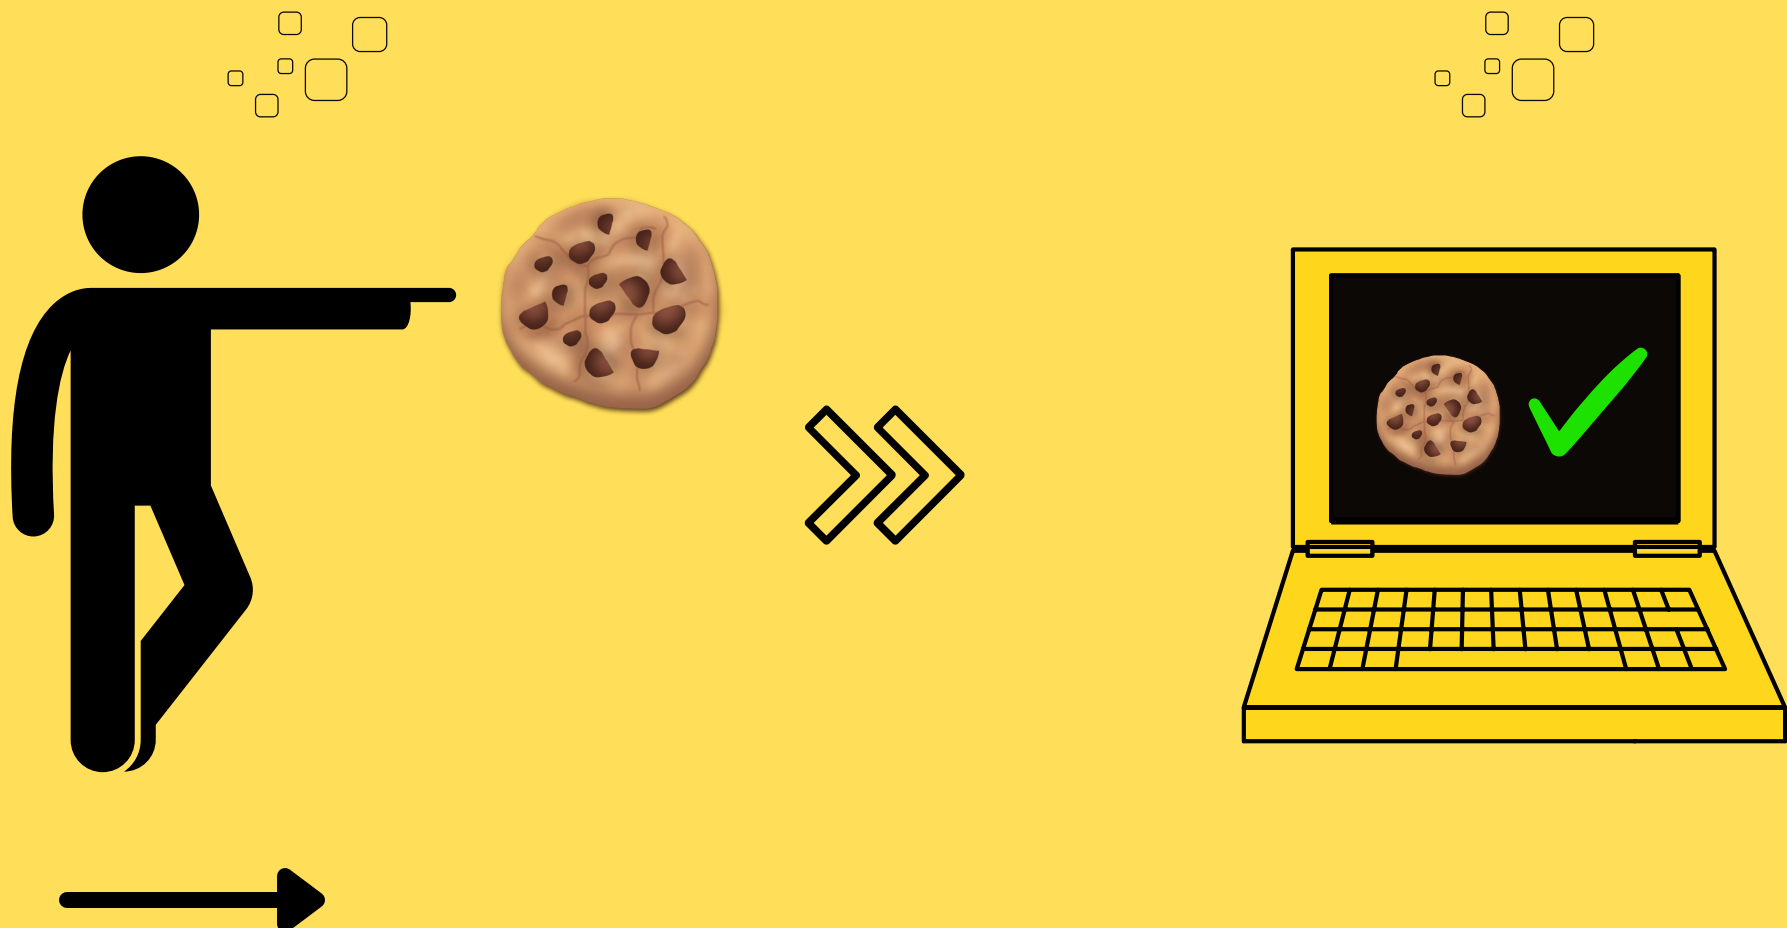

A cookie is a small piece of information that a website stores on your computer. When you go back to the website, your browser sends the information back to the site.

Accept Cookies

accept cookies

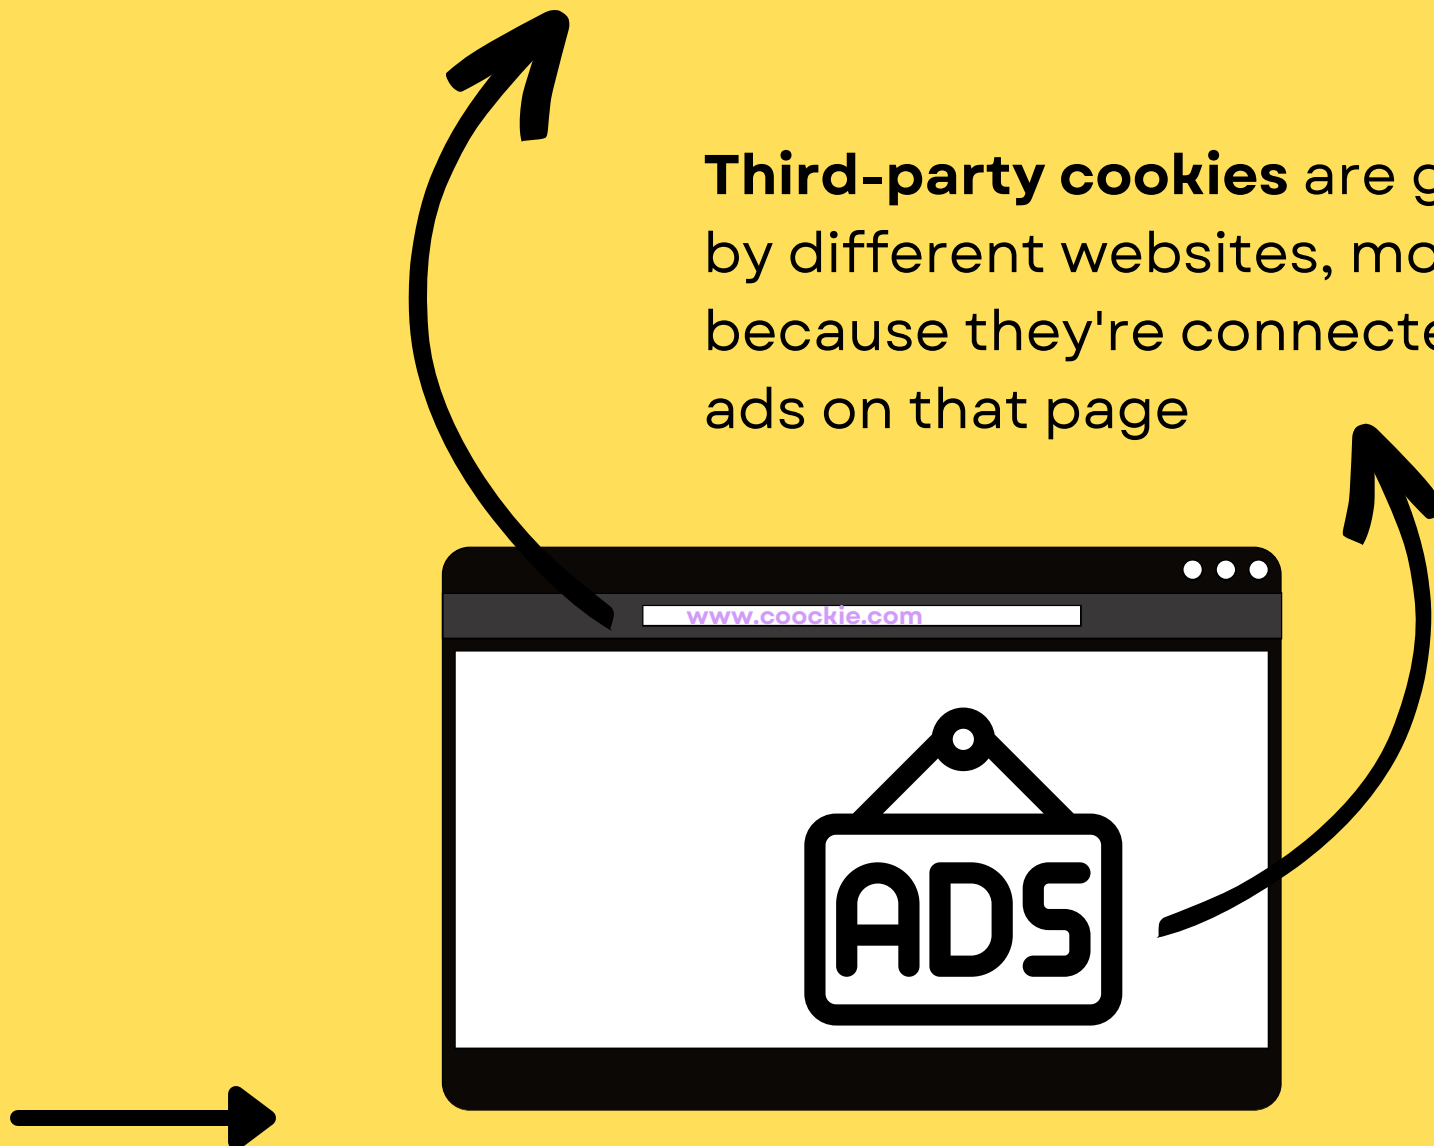

**I know you've already signed up
please continue with your order**

First-Party vs. Third-Party Cookies

First-party cookies are created by the website you are using

Third-party cookies are generated by different websites, most often because they're connected to ads on that page
